## Overview

Due to mandates aimed at improving the nation's healthcare while reducing spending, health plans are creating and implementing new approaches to achieve success under the evolving CMS Five-Star Quality Rating System. In order to obtain and maintain the desired 4 or 5 Star Rating, health plans have implemented programs and other initiatives to improve patient outcomes, quality, performance, and collaborative relationships with providers. Health plans report on all aspects of services offered, and optimizing member engagement and satisfaction. As the Star measures continue to change and evolve, health plans are also following suit in order to achieve high star ratings which will determine reimbursement revenues, bonus payments, member enrollment and marketing opportunities.

We have created an exciting, high-level forum featuring knowledgeable leaders and executives from the nation's leading health plans who will share their perspectives, valuable insights and expertise on how to be best equipped for critical changes in achieving high Star Ratings. Attendees will benefit from learning about new best practices, initiatives and strategies that have been deployed to address the challenges presented under the current healthcare environment to improve the quality and delivery of healthcare while reducing costs and improving member satisfaction.
