

2019 Reducing Hospital Readmissions Summit

Reduce Hospital Readmissions through Enhanced Discharge Planning, Improved Payer-Provider Collaboration, and an Efficient Care Transitions Program – Develop an Effective Population Management Model and Enhance the Patient Experience!

June 13 – 14, 2019 • The Roosevelt, A Waldorf Astoria Hotel • New Orleans, LA

Overview

Preventable hospital readmissions are costing the healthcare system approximately \$25 billion on an annual basis, and it is estimated that one out of every five Medicare patients is readmitted to the hospital within 30 days of discharge. In an attempt to control excessive spending on avoidable healthcare costs as well as to improve quality care, performance and patient health, CMS has instituted new regulations and higher penalties. Hospitals and health systems are especially affected by the new mandates, and are exposed to increasing financial risk.

We have created a high-level forum featuring providers and payers who will share their insights and expertise on how to lower readmission rates through recognized and proven discharge programs and follow-up plans, simultaneously reducing costs and improving quality of care. This impressive program will include distinguished members from highly regarded institutions comprised of hospitals, health systems, health plans and industry experts; featuring best practices to utilize in today's rapidly evolving world.

This is the only conference on Reducing Hospital Readmissions that will equip you with innovative strategies and tools to be better prepared for 2019. By attending the *2019 Reducing Hospital Readmissions Summit*, you will learn what others in clinical integration, utilization management, patient care and reimbursement are doing to be prepared for the challenges that lie ahead in 2019 and beyond.
